

COMMITTEE ON ENVIRONMENT AND NATURAL RESOURCES

COMMITTEE REPORT

NO. ENR 02-S-2025

Office of the Sangguniang Panlungsod
Received by: Honet M. Tela
Date: JUL 11 2025
Time: 1:30 PM

Subject: **PCR 006-2025** A RESOLUTION INTERPOSING THE CITY GOVERNMENT OF BACOOR'S OPPOSITION TO THE PROPOSED PARAÑAQUE SPILLWAY PROJECT (*PCR 006-2025 dated July 07, 2025*).

The Committee held a committee hearing on July 11, 2025, at 12:40 pm. At the Sangguniang Panlungsod, 6th Floor Bacoor Legislative & Disaster Resilience Building, Bacoor Government Center, Bacoor City, Cavite. It was presided over by the Chairperson of the Committee on Environment and Natural Resources, Hon. Levy M. Tela.

FINDINGS:

Due to significant risks to our city, especially those that could impact our aquatic resources, which are a major source of livelihood for our citizens. The project's construction may contaminate water sources, which could have negative effects on the economy, ecology, and public health. Additionally, it is vulnerable to erosion because of subterranean drainage channels, causing disastrous water spills, intense floods downstream, and maybe fatalities, mostly in the areas most impacted.

The City of Bacoor's fishing community will suffer as a result of the spillway. The spillway's injection of freshwater will reduce the amount of spit collected, which will have a significant effect on the fishermen's mussel productivity. Crustaceans, other marine goods, and other bivalve species will also be impacted. Because water bodies were contaminated during project construction, there is a chance that water pollution will have a negative impact on the economy, environment, and public health. Additionally, a catastrophic water discharge could occur, causing severe floods downstream and even fatalities, mostly in the most impacted areas.

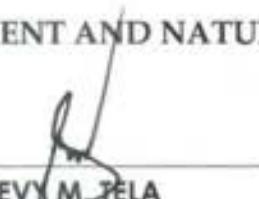

RECOMMENDATION:

After deliberations, the committee reached a majority decision to oppose the proposed Parañaque Spillway. Accordingly, the committee respectfully recommends to **PASS** the resolution Interposing The City Government Of Bacoor's Opposition To The Proposed Parañaque Spillway Project.

WE HEREBY CERTIFY that the contents of the foregoing report are true and correct.

Signed this 16th day of July 2025 at the City of Bacoor, Cavite.

NO. ENR 02-S-2025

Office of the Sangguniang Panlungsod
Received by: JUEL P. 20250
Date: _____
Time: 1:30 pm

Subject: A RESOLUTION INTERPOSING THE CITY GOVERNMENT OF BACOOR'S OPPOSITION TO THE PROPOSED PARANAQUE SPILLWAY PROJECT. (PCR 006-2025-dated July 7, 2025).

Attendance: Hon. Levy Tela (Chairman, Committee on ENR)
Hon. Reynaldo Palabrica (Member, Committee on ENR)
Hon. Adrielito Gawayan (Member, Committee on ENR)
Hon. Ricardo Ugalde (City Councilor)
Hon. Manolo Galvez Jr. (City Councilor)
Hon. Simplicio Dominguez (City Councilor)
Hon. Miguel Bautista (City Councilor)
Ms. Theresa Calo (CESD)
Ms. Rhowena Alcantara (CPDC)
Mr. Allan Chua (OAS)
Engr. Jicky Jutba (CEO)
Atty. Marco Mendoza (OCLS)
Atty. John Carlo Fajo (City Admin)
Charisse Olive Dela Cruz (BDRRMO)

Venue: SP Session Hall, 6th Floor, BLDR Bldg., BGC, Bacoor City, Cavite

Date/Time: 11 July 2025, 12:40 pm to 1:46 pm

Introduction: Hon. Levy Tela explained that the proposed Parañaque Spillway Project poses a significant threat of increased flooding in Bacoor. The spillway may damage to local ecosystems, and increased siltation or pollution in critical areas like Manila Bay and coastal barangays of Bacoor.

Proposed: Everybody agrees to issue a resolution interposing objection on this proposed project.

Cert. no. 24/IB1809

Mr. Chua: Magandang hapon din sa atin po lahat. Sa amin po sa side po ng City Agriculture Services po, kinonsulta ko po Mr. Chair, ang ating Sea Farm Council. Siya po yung nangangalaga at lumilikha ng mga proposed ordinances regarding po sa dagat. Ngayon, nung diniscuss ko po sa kanila to, sabi ko, bumaba kayo sa barangay nyo and then imeting nyo ang mga registered fisher folks natin kung ano magiging opinion. At napagkaisahan po ng konseho na gumawa ng position paper na ayaw po nila na ito pong Parañaque Spillway nag-oppose po sila. Dahil nga po, number one, ang unang-una ang tatamaan ay hanap po nila sa dagat. Kasi po, yung mga laman-dagat natin dito ay hindi naman po yan sanay na laging tubig-tabang. Kasi po, manggagaling sa Laguna po, ang tubig niya, ang ibubuga dito sa atin sa Bacoor. Pangalawa po, siyempre po, nandyan din yung ating proposed na reclamation. May epekto din po yun eh. Inner at outside na reclamation po. Yun po yung kanilang stand po talaga na ayaw nila. Ino-oppose nila po itong Parañaque Spillway.

Ms. Alcantara: Sa aming pag-aaral, ito po ay makaka-apekto sa ating reclamation project. Mag-co cause po ng flooding, lalo na po sa District 1. Makaka-apekto po sa ating mga fisher folks. Dahil hindi naman po malinis na tubig yung ilalabas nitong spillway, kundi polluted din po.

Ms. Calo: Base po dito sa mga documents na pinag-aralan po namin. So, ito pong project na to ay sponsored po yata. Ito ng JICA, no? JICA po. And then, dumaan naman po sila sa proseso. Meron po silang Environmental Compliance Certificate na in-issue po ng NCR po yata ito. NCR, yes. And then, dito po sa proyektong ito, nag-conduct po sila. Ang project location po is may area akong nakita ditto yung barangay sa Zapote 5, previously na ngayon ay sa Zapote 3. Ito po ang project location po nila na affected po sa atin. Ngayon po, ang parang sa tingin ko yung ginawa nilang public scoping, hindi po, hinanap ko, hindi included. Walang representative ang Bacoor eh. Although, kasama tayo doon sa location. Pero kung titignan po, sa public scoping na ginawa po nila, hindi po kasama ang Bacoor. Ngayon po, hindi naman po natin hinaharangan kung ano yung mga development na gusto po nilang mangyari sa atin. Kasi minsan, kailangan po natin yun eh. Pero dapat, siyempre, isasaalang po natin yung mga potential impact sa ating environment. Meron po sila ditto yung mga mitigation measurement na ginawa under ng environmental management plan po nila. Pero hindi ko nakita ditto yung environmental monitoring na gagawin po nila dito. So, tsaka base na rin po sa mga experience ng mga project. Sa una lamang po ito talagang masigasig. Pero, pagka-operational na po siya, wala na po yung maintenance. Wala na po yun. So, in addition po, may fund na ginugul po, igugugul ditto yung JICA. Pero hindi ko po nakitaan ditto kung ano naman yung counterpart ng mga city involved. Kasi after nang ma-construct yan, natural, may maintenance too eh. Hindi po ba? Tapos po, isa pa po, ang Zapote River po natin, isa po yan sa water quality management, area base, no? Na dineclare po as as yung pong pinangangalagaang river sa buong Kamainiraan at kasama po yung Region 4A. So, dineclare po ito ng DNR. Siguro ang NCR, alam po nila, may last piece up na tinatawag eh. Wakma water quality management area base na marami po silang programa dito na ibinabato, mga pondo na ibinabato. Para lang gumanda at luminis ang Zapote River. Hindi ko nakita yun sa mga documents eh. What if pag na-construct na itong spillway, ano na nangyari dun sa mga programs ng DNR, NCR, at saka Region 4A. So, yun po yun. At saka po, maaari po itong mag-cause ng pagbaha. Kasi downstream po ang Bacoor. Downstream po yung Bacoor. Sa amin po, ang proyektong ito ay maganda para sa development. Ngunit, ito po, marami po sa ating maapektuhan dito. So, para sa amin po, hindi po kami pumabayag na i-construct po ito. Lalo na nasa

malapit tayo sa Manila Bay. Once na yung tubig, yung ano dito, lulubog na po ang Bacoor kasama pa po dito yung sa reklamasyon natin, hindi kakayanin tubig, baka lumubog na po tayo. Yun lamang po sapati po ng environment. Marami pong salamat.

Ms. Charesse: sa BDRRMO po, we highlighted some factors po na makaka-affect po sa atin. Ito po yung possibility po ng water pollution po na makaka-affect po sa environment, sa ating economic, at saka sa health risks po. And then po, next po, susceptible po ito sa soil erosion po. Due to underground tunnel po kasi po ito. Then, we also take into considerations po na, yung, during high tide po, lalo na po, masasabayang po ng tropical storm po. So, mas affected po talaga yung ating coastal areas po. So, may stagnate po yung water natin dito, sir. So, makaka-affect po talaga ng flooding.

Engr. Jutba: Base dito sa sulat ni Secretary ng DPWH sa Manuel Bunuan po through the Sanggunian at kay Mayor po. Nakalagay po rito na yun pong project na ito is Unified Manor Recovery for the Pasig-Marikina River dahil yun, ang discharge mo nila is Laguna de bay na liksyor po. And, as I've, ano po, sa pagkaka-recall ko, this project was endorsed to my office last 2020, early 2020 po. Matagal na pong project to, proposal. And, several times po na didiscuss sa office naming with kasama po si Mayor Lani dati, lahat po ng technical na discuss na po sa amin. So, for the record, yung project na ito is from dadaan ng Muntinlupa City, then Paranaque, Las Piñas, then yung discharge outfall po is Bacoor. So, yung outfall nito, for record po, sa pag-present po sa amin, is after po ng bridge, yung boundary natin ng sa may Cavitex, dun po ang discharge outfall nito. Yes po. So, ang katwiran nila, sa dagat naman po yung portion na discharge outfall nila. But then, yun pa rin, is connected pa rin sa Zapote River natin. For ano lang, for discussion lang po. For information po sa lahat, ang discharge rate nito is 300 cubic per seconds. Ganun po kalakas yung discharge rate nung spillway na to. So, powered po by motor to, that's to discharge ng water. Ganun po kabilis. Now, ang ano nito, ang consideration nito, is mag-discharge lang po sila once mapuno po yung Laguna Lake natin. So, pag umulan sa area nila, napuno yung Laguna Lake at puno na po yung Pasig Marikina River, that's the time na mag-discharge po sila sa outfall natin, sa Bacoor. So, the question po nun, is paano nun po kung maha din po sa Bacoor at high tide pa? So, medyo very big challenge po sa atin, lalo na tayo yung number one po sa flood front. Since lahat ng tubig galing sa upland, sa atin din po ang bagsag. So, ako personally po, bit-bit ko po yung office ng engineering at sa buong Bacoor po, na tinilaga bilang city engineer po. I will personally position po, bringing my office na hindi po po pwede yung project na to, na itatapon po sa Bacoor po. Thank you po, your honor.

Atty. Marco: So, definitely, hindi naman automatically magkakaroon ng stoppage pertaining to their ongoing construction kung sakaling nag-start na. The reason why we are conducting this particular hearing, na we are objecting to that particular proposed project, though it may benefit the areas around Laguna de Bay, pero on the other hand, it will adversely affect the surrounding, I mean, yung mga affected cities of the project, particularly the city of Bacoor, that is the time that we tell them na ito yung mga negative impacts na maaari mangyayari. So, through a resolution objecting to the proposed project, it would tell them na, wait lang, merong suggestions or other recommendations ang LGU Bacoor, who is one of the most likely affected cities or municipalities ng particular project. So, syempre, before din naman mag-start ng project ang national, meron tayong devolution ordinance, if you can still remember, na yung mga projects, even if it's coming from the national agencies, kailangan pa rin ang approval ng local government unit. Example niyan, yung mga DPWH project, it should be with approval

and concurrence ng city council and the mayor kung itutuloy o hindi. So, if this project, if we think na talagang hindi siya makaka, though makakapag-benefit naman siya sa majority of that area, but kung magkakaroon ng adverse effect dito sa atin at sa ating mga residents, definitely, we have to ask them to stop.

Adjourned: Hon. Tela adjourned the hearing was adjourned at 1:46 pm.

SUBJECT : REQUEST FOR A RESOLUTION INTERPOSING THE
CITY GOVERNMENT OF BACOOR'S OPPOSITION
TO THE PARAÑAQUE SPILLWAY PROJECT

Dear HON. ROWENA BAUTISTA-MENDIOLA,

Greetings!

In line with our commitment to protecting the welfare and interests of our constituents, we respectfully request the passage of a resolution vehemently opposing the Parañaque Spillway Project. This request is based on the attached position paper prepared and signed by the concerned departments, as well as on the other supporting documents outlining the significant environmental, social, and economic impacts of the proposed project.

After thorough assessment and consultation, it has been determined that the spillway project poses substantial risks to our city, particularly in terms of affecting the aquatic resources of our City, which is one of the main source of livelihood of our residents. Water pollution could harm the economy, the ecology, and human health as a result of the project's construction contaminating water bodies. Furthermore, the same is prone to erosion due to underground drainage channels, resulting in catastrophic water release, severe downstream floods, and potential loss of life, primarily in the most affected locations. Given these critical ramifications, we seek the strong support of the Sangguniang Panlungsod to openly express our opposition through an official resolution.

City Administrator

BACK

POSITION PAPER ON THE PROPOSED PARANAQUE SPILLWAY

ANTECEDENT FACTS

On 11 December 2023, the Department of Public Works and Highways requested endorsement from the Bacoor City Government and the City Development Council on the Proposed Paranaque Spillway Construction Project.

On 08 February 2024, a meeting was held at the City Administrator's Office to discuss the proposed official position of the City Government of Bacoor regarding the Proposed Paranaque Spillway Construction Project. Representatives from the Office of the City Engineer, the Office of the City Agricultural Services, the Office of the City Administrator, and the Office of the City Legal Service were in attendance.

The initial discussion by the Office of the City Engineer showed that there are risks to the detriment of the City of Bacoor should the construction of the Paranaque Spillway Project proceed. The Office of the City Agricultural Services seconded its objection to the project with its opinion that the operation of the Paranaque Spillway might negatively affect the aquatic resources of the City.

The said meeting was concluded by an agreement to the issuance of the respective technical reports of the Office of the City Engineer, the Office of the City Agricultural Services, the City Planning and Development Coordinator's Office (CPDC), the City Environment Service Department, and the Bacoor Disaster Risk Reduction and Management Office.

BRIEFER ON THE PARANAQUE SPILLWAY PROJECT

The CPDC issued a summary¹ of the aforementioned project as follows:

Project Title	Paranaque Spillway Project
Proponent	Department of Public Works and Highways

¹ ANNEX A – CPDC Letter dated 18 February 2024.

Opinions of Various City Offices

The Office of the City Agriculturalist posits that the spillway will negatively affect the fisherfolk community of the City of Bacoor. The spat collection will be lessened due to the introduction of freshwater by the spillway, thereby greatly impacting the mussel production of the fisherfolk. There will also be an effect on other bivalve species, crustaceans, and other marine products⁶.

The Bacoor Disaster Risk Reduction & Management Office has the following concerns:

1. There is a possibility of water pollution causing an adverse effect on the economy, environment, and human health due to the contamination of water bodies during the construction of the project;
2. There is a susceptibility to erosion due to an underground drainage channel, which may cause the failure of spillway structures. This may lead to a catastrophic release of water, resulting in severe downstream flooding and possible loss of life, predominantly in most affected areas.

The BDRMMO further noted that a thorough feasibility study is required due to its possible negative impact⁷.

Finally, the City Environment Service Department (CESD) mentioned three key factors in considering the proposed Paranaque Spillway Project. First, the CESD would like to note that the Zapote River is within the Water Quality Management Area boundary of the Las Piñas-Paranaque River System where various action plans for projects and programs on the protection, preservation, and revival of the quality of the water bodies and to make it a sustainable resource for stakeholders. Second, the Zapote River Watershed is also one of the identified Priority Critical Watersheds supporting the National Irrigation System of the National Irrigation Administration. Third, the Zapote River Watershed is under a Watershed Management Plan adopted by the concerned Local Government Unit.

Finally, this Office observed based on the available records there was no consultation with the City Government of Bacoor and various stakeholders in the City of Bacoor regarding the Proposed Paranaque Spillway Project. It is the duty of National Government Agencies to consult with local government units nongovernmental organizations, and other sectors concerned and explain the goals and objectives of the project or program, its impact upon the people and the community in terms of

⁶ ANNEX F – Letter from the Office of the City Agriculturalist dated 14 February 2024

environmental or ecological balance, and measures that will be undertaken to minimize the adverse effects thereof⁷.

In fact, Section 27 of the Local Government Code expressly prohibits the implementation of any project or program by government authorities unless such consultations are complied with, and prior approval of the Sanggunian concerned is obtained.

The Supreme Court in the case of Republic v. Sps Lazo (G.R. No. 195594, 29 September 2014) enumerated those projects and programs whose effects are among those in Sections 26 and 27, to wit, those that:

1. May cause pollution;
2. May bring about climatic change;
3. May cause the depletion of non-renewable resources;
4. May result in loss of cropland, rangeland, or forest cover;
5. May eradicate certain animal or plant species from the face of the planet; and
6. Other projects or programs that may call for the eviction of a particular group of people residing in the locality where these will be implemented

The ECC covering the project actually and expressly recognizes that there will be a negative environmental impact due to the project and has enumerated the mitigating efforts that must be accomplished to lessen such negative impact. Due to this fact and provisions of law, it behooves the DPWH to conduct and coordinate with the City Government of Bacoor for the appropriate public consultation and more importantly the prior approval of the Sangguniang Panlungsod of the City of Bacoor be obtained.

To recall, the DPWH letter dated 11 December 2023 addressed to the City Mayor simply requests an endorsement by the Bacoor City Government and its City Development Council. It is silent as to the requirement of public consultation and the requisite approval of the Sangguniang Panlungsod.

CONCLUSION

Considering the aforementioned discussions and reports issued by various City Government Offices, the following Offices respectfully interpose their objections to the Proposed Paranaque Spillway Project. As such it is recommended that the Honorable Sangguniang Panlungsod issue a City Resolution expressing such objection be passed.

Bacoor City, 11 April 2024.

CITY PLANNING AND DEVELOPMENT COORDINATING OFFICE

16 February 2024

ATTY. AIMEE TORREFRANCA-NERI
City Administrator
City of Bacoor Government Center
Brgy. Bayanan, City of Bacoor, Cavite

Dear Atty. Neri,

This has reference to your Administrative Memo No. 145 s. 2024 regarding the proposed Construction of Parañaque Spillway Project located at the Cities of Muntinlupa, Parañaque, and Las Piñas, Metro Manila, and City of Bacoor, Province of Cavite.

Attached is the project brief and initial observations prepared by the CPDC on the said project for your reference.

Thank you.

Very truly yours,

RHOWENA D. ALCANTARA
Planning Officer III/OIC

PROJECT BRIEF

Proposal	Construction of Parañaque Spillway Project
Action Required	Endorsement of the Construction of Parañaque Spillway project proposal by the City Development Council (CDC) of the City of Bacoor as one of the Regional Development Council (RDC)-IV-A requirements
Proponent	<ul style="list-style-type: none"> • Department of Public Works and Highways (DPWH)
Source of Fund	<ul style="list-style-type: none"> • Funded under the Official Development Assistance (ODA), through the • Japan International Cooperation Agency (JICA) • Special Terms for Economic Partnership (STEP) Loan
Location	<ul style="list-style-type: none"> • Cities of Muntinlupa, Parañaque, and Las Piñas, Metro Manila • Brgy. Zapote V, City of Bacoor, Province of Cavite.
Project Objectives	<p>The project aims to</p> <ul style="list-style-type: none"> • mitigate inundation damage at the Laguna de Bay Lakeshore Area, as the need for flood control arise due to constant increase of water level at Laguna de Bay. • contribute to the stabilization of livelihood, production, and early post disaster recovery including the Pasig-Marikina basin in a unified manner.
Project Description and Rationale	<p>The construction and operation of the Proposed Parañaque Spillway Project, with a reservoir flooded/inundated area of 67.4 square kilometers by 2023 based on 100-year probability. The project is comprised of the following components:</p> <ul style="list-style-type: none"> • Inlet Facility (intake) • Outlet Facility (drainage) • Spillway (underground tunnel type) <p>Environmental Management</p> <ul style="list-style-type: none"> • All commitments, mitigating measures and monitoring requirements, contained in the Environmental Impact Statement (EIS) particularly in the Environmental Management Plan/Environmental Monitoring Plan (EMP/EMoP), shall be instituted to minimize any adverse impact of the project to the environment and comply with all environmental regulations (RA 8749, RA 9275, RA 6969, RA 9003)
Scope	<ul style="list-style-type: none"> • Construction of open channel, jetty and outlet facility including operation of the construction yards in the inlet and outlet facilities
Initial observations	<ul style="list-style-type: none"> • The proposed project is not aligned to our Reclamation project drainage system. • The proposed project will cause flooding, considering the volume of discharge water spread freely in Manila Bay that can affect the low-land areas of the City of Bacoor. • The said project brings danger of land subsidence, danger of storm surge and strong waves caused by typhoons. • The said project will have a potential impact to the marine ecology and water quality of Manila Bay which affects the growth of mussels, one of the livelihoods

Public Hearing Report
PROJECT OVERVIEW

SECTION 1
PROJECT OVERVIEW

- Under the Marcos' Flood Control Program in 1960, the Manggahan Floodway and the Parañaque Spillway were proposed as flood control measures in Metro Manila, however, were not pursued. In 1975, an overall flood control plan was formulated for Metro Manila and Laguna de Bay lakeshore area and the Parañaque Spillway was identified to reduce the high-water level in the lake and in the same year, the feasibility study was conducted for Parañaque Spillway. Based on the FS, the project will require high project cost and will have great social impacts thus, the construction and implementation of the project was again postponed. The Parañaque Spillway was also included in the framework plan of comprehensive flood control measures for Metro Manila in the 1990 Manila Flood Control Plan Study.
- In 2018, the Comprehensive Flood Management Plan in the Laguna de Bay Lakeshore Areas was drafted by the Department of Public Works and Highways. The identified measures in the master plan to reduce the inundation damage at the Laguna de Bay lakeshore area and to control the rise of lake-water level are the (a) construction of the Parañaque Spillway, (b) construction of lakeshore diking system and (c) implementation of non-structural measures as response to floods on the Pasig-Laguna basin.
- The Parañaque Spillway alone could not completely eradicate flooding at the entire lakeshore area however, by controlling the lake water level, it may reduce the inundation depth within the lakeshore area thus, shortening the inundation period and inundation damage. To attain an early effect and due to its short construction period as compared with dike construction, the Parañaque Spillway Project was approved as a priority project during the 4th Steering Committee Meeting held on 23 January 2018.
- Table 1 provided some basic information regarding the proposed project, the Proponent, and the Environmental Impact Assessment (EIA) preparer.

ACTIVITY RATIONALE

2.1 PUBLIC HEARING IN LAGUNA LAKE SIDE

- 1 The Public Hearing schedule was agreed during the 1st Technical Review of the Review Committee (REVCOM) last 1st of September 2022. The Notice of Public Hearing was officially posted on https://eia.emb.gov.ph/?page_id=72 last 8th of September 2022. Included in the uploaded documents were the latest Environmental Impact Statement (EIS) and EIS Summary for the Public (ESP) written in both Filipino and English.
- 2 The Notice of Public Hearing was published with Philippine Daily Inquirer last 13th and 20th of September 2022 (see ANNEX A).
- 3 The distribution of the official invitations from the DENR Environmental Management Bureau (EMB) was conducted on the 19th of September onwards. The following were invited.
- 4 The receiving copies of the public hearing invitation letters were presented as ANNEX B of this report. The Public Hearing program was shown in Figure 1.

2.2 PUBLIC HEARING IN MANILA BAY SIDE

- " The Public Hearing for the Manila Bay side (Cities of Las Piñas and Bacoor) of the proposed project was originally set on 29 September 2023, however, EMB postponed the said public hearing until further notice. DENR-EMB Central Office announced on their website¹ and official Facebook page² the deferment of the activity (Figure 2).
- " A new schedule and Notice of Public Hearing for the Manila Bay side of the proposed project was officially posted on https://eia.emb.gov.ph/?page_id=72 last 21st of June 2023. The Notice of Public Hearing was also published with Philippine Daily Inquirer last 26th of June and 3rd of July 2023 (see ANNEX A).
- " The distribution of the official invitations from the DENR Environmental Management Bureau (EMB) was conducted on the 4th of July onwards. The following were invited:

Public Hearing Report
SUMMARY OF ISSUES AND CONCERN

SECTION 4
SUMMARY OF ISSUES AND CONCERN

- 1st The presentation material that guided the flow of the Public Hearing was provided as ANNEX D of this report. The pertinent issues, concerns, and suggestions raised by the participants during the open forum and the corresponding responses of the project proponent and EIA consultant are summarized in the matrices below.
- 2nd Generally, the issues and concerns raised during the two public hearings conducted were about the potential impact of the project to the marine ecology and water quality of Manila Bay, the resettlement of the households that will be affected by the project in Brgy. Bull, the safety of the households where the tunnel will pass through and the potential inducement of flooding in Manila Bay once the project operates. Overall, the stakeholders for both the Laguna Lake side and Manila Bay side did not raise any objections or disapproval on the goals and objectives of the project during the public hearings.

Table 6: Matrix of Issues and Concerns Raised During the Public Hearing (Laguna Lake Side)

ISSUES AND CONCERN RAISED ON THE FOLLOWING MODULES	SECTOR OR PERSONS WHO RAISED THE ISSUES/CONCERN	PROPOSER RESPOND TO ISSUES/CONCERN
Project Description <i>"The proponent had a project presentation and consultation with the city council. Now that the feasibility study phase of the project is complete, does this indicate that the stakeholder consultation is over?"</i>	Hon. Mamerte "Metong" Sevilla City Councilor, Muntinlupa LGU	<u>Elder, Joma Jim (LCI)</u> : Yes, this feasibility study is completed but it doesn't mean that we are not allowed to conduct another feasibility study for other alignments. We have a year to see if the project will push through or not and if there will another feasibility study.
<i>"If the project will be implemented, we request DENR and LLDA to allow us to reclaim some portions of the lake to make it as a relocation site for the affected residents of Barangay Bull."</i>		This is a national project, not merely a project for the four local governments. Other LGUs such as Laguna and Rizal that would be impacted by this project were also consulted by DPWH.
<i>"We also want to reconsider our suggestion to move the jetty and intake further out into the lake."</i>		
<i>"Considering one of the alternative alignments of the project along Barangay Sucat, the proponent will save more time and budget in pursuing this alignment compared to the alignment along Barangay Bull."</i>	Hon. Marissa Rongavilla City Councilor, Muntinlupa LGU	<u>Elder, Joma Jim (LCI)</u> : The DPWH already addressed some of the concerns raised by Councilor Rongavilla. The premise for the EIA Report considers the latest information provided by JICA Study Team and DPWH.
<i>"If the project will be implemented, we propose using the excavated soil during project construction for reclaiming a portion of the lake as</i>		We assure everyone that in our report, all issues and concerns raised during the past consultations were included covered in the executive summary.

*a resettlement site for the affected
residents of Barangay Buli."*

Land

"Parañaque City will or might cater
the flooding problem of Rizal and
Laguna.
In the 1980's, this project is feasible
with the alignment that was
presented; however, since
Parañaque is now a highly
urbanized city, we cannot afford to
shoulder the burden of the
construction such as vibrations,
erosion, land settling and
permanent effects (leakage,
corrosion, and water pollution) that
this project might cause.

The city has a proposal for a
mananil project coinciding parts of
the alignment of the spillway
project.

Consider exploring other alignment
or other projects that will address
the same flooding issues.

The city shares the same sentiment
with the other LGUs rejecting this
project."

"Please consider moving the jetty
and intake further out into the lake.

Did you also consider the effects of
earthquake to the structure?"

Water

"What will be the effect of the
project to the water quality of the
lake, as well as to the livelihood of
the fisherfolks?"

Engr. Regor Leuric
Columna,
Planning Officer I,
Planning Office of
Parañaque

Mr. Jonas Lato, Public Hearing Officer
(DENR-EMB)

The concerns were duly noted by DENR
EMB.

Hon. Cornelio "Elliot"
Martinez
City Councilor,
Muntinlupa LGU

Engr. Joma Lim (LCI):

The influence of an earthquake on the
structure was considered during the initial
feasibility study. The earthquake
implications will be explored further
throughout the project's detailed
engineering design/study.

Ronaldo Molera
Fisherfolk, Brgy. Sucat

Engr. Joma Lim (LCI):

In terms of water quality, the project will
not affect the lake.

Table 7: Matrix of Issues and Concerns Raised During the Public Hearing (Manila Bay Side)

ISSUES AND CONCERNS RAISED ON THE FOLLOWING MODULES	SECTOR OR PERSONS WHO RAISED THE ISSUES/CONCERN	PROPOSER RESPOND TO ISSUES/CONCERN
Project Description <i>What are the possible impacts of the ongoing reclamations on your project, and your project to the ongoing reclamations?</i>	<i>Mr. Joseph Retorta, Patola HOA; Brgy. BF International Village</i>	<i>PM Rhodora Dayco (DPWH);</i> <i>No reclamation is being considered for the project in the Manila Bay. The project consists of an underground tunnel, and a gate for the outlet in Manila Bay.</i>
<i>Emer. Joma Lim (LCI);</i> <i>I would like to clarify that there will be no reclamation in Manila Bay. In addition, reclamation projects are mostly proposed by our Local Government Units (LGUs). If no reclamation will be performed in the outlet, the discharge water can spread freely in the Manila Bay. Otherwise, DPWH will consider the approved reclamation projects in the vicinity of the outlet since it will hinder the flow of discharge water.</i>		
<i>Mr. Chester Chua (PRA);</i> <i>To explain further the concept of rising sea water level, Manila Bay is an open water wherein if you put a certain cubic meter of sand, its impact would be minimal. If in case the water level rises, it will flow outwards not inwards.</i>		
<i>Emer. Joma Lim (LCI);</i> <i>We would like to correct that the two hectares was based on the old design. Based on the new design, the structure for the outlet considers approximately 0.6 hectares only. We also advise DPWH to secure an area clearance or appropriate permit from PRA, if necessary for the proposed operation center.</i>		
<i>Mr. Benjamin Antolin, Councillor, Brgy. Pulang Lupa Uno;</i> <i>PM Rhodora Dayco (DPWH);</i> <i>Based on the studies, it would be 260 cubic meter per second. This is minimal as compared to the area of Manila Bay which is about 1,800 square kilometers.</i>

ISSUES/CONCERNS

In the event of heavy rainfall, for example 15 days of continuous rainfall, can the open canal accommodate such?

Mr. Joey Marasigan
UZOV, Brgy. Pulang Lupa
Des

Engr. Jamie Lim (JICA)

The project considered 100-year return/design period. In this design, a gate will be constructed to control the level of water and hinders overflow.

Land

What is the possible effect of "The Big One" to the project?

Ms. Josefina Victoriano
CUB HOA President,
Brgy. International
Village

Mr. Arvin Arguel (JICA Study Team)

West Valley Fault is a major faultline being monitored for the project. This is located in the Muntinlupa side. As a preventive measure, an open channel was proposed since it can be repaired immediately as compared to a tunnel system.

Water

As mentioned earlier, the project will contribute to the decrease of salinity within Manila Bay. This can introduce a problem to the growth of mussels, which is one of the livelihoods of the fisherfolks?

Mr. Benjamin Antolin
Councilor, Brgy. Pulang
Lupa Uno

Engr. Jamie Lim (JICA)

This was considered in our study. We have conducted baseline water sampling to determine the current water quality in Manila Bay. This is the basis of our projection that salinity will decrease by 1 PSU during the operations. However, it shall be noted that the operation will only be seasonal thus, it is not expected to significantly impact the salinity of the Manila Bay.

PM Rhodora Davye (DPWH)

With regard to your concern, we have regional and district offices who handle locally funded projects. Our office focuses on major and/or principal river basins. This is noted, and we will inform the respective regional or district offices.

Since the proposed project will operate 14 years from now, do you have any projects being implemented to address flooding problems in our areas here in Las Piñas?

Mr. Joel Centra
Saint Joseph Park HOA,
Brgy. Pulang Lupa Des

PM Rhodora Davye (DPWH)

Air

No issues raised for this module.

People

May I also suggest that another consultation shall be conducted during the detailed engineering design of the project?

Mr. Joey Marasigan
UZOV, Brgy. Pulang Lupa
Des

PM Rhodora Davye (DPWH)

Considering that the project is proposed to be funded under JICA, the social and environmental consideration are very important aspect of the said project. If there are still not considered in this study during detailed design stage, it may be included/incorporated. Also, there will be a continuous information education campaign to the stakeholders during construction stage.

What are the effects of the spillway project to the project of Maynilad?
One of Maynilad's water source is the Laguna de Bay.

Mr. Danilo Bortomeo,
CUBHOA Vice President,
Brgy. BF International
Village

Mr. Arvin Arguel (ICA Study Team)

Two water companies utilize Laguna Lake as water source. We consulted them early this year, and their major concern is the salinity of Laguna Lake. The water level is not a problem since they will operate at a minimum of water level, while the project can operate only above a certain level or the flooding level.

Kindly consider all PRA approved reclamation in the proposed outlet during the technical or detailed engineering design.

Mr. Chester Chua,
Planning Officer III,
PRA

PMA Rhodora Dayco (DPWH)
This is noted. Thank you very much.

ECC-CO-2209-0032

03/14/2023

EMIL K. SADAIN, CESO I
Senior Undersecretary
Department of Public Works and Highways
Bonifacio Drive Port Area
Metro Manila

Subject: ENVIRONMENTAL COMPLIANCE CERTIFICATE

Dear Senior Undersecretary Sadain:

This refers to the application for an Environmental Compliance Certificate (ECC) of the Department of Public Works and Highways (DPWH) for its proposed Parañaque Spillway Project to be located at the Cities of Muntinlupa, Parañaque, and Las Piñas, Metro Manila, and City of Bacoor, Province of Cavite.

After satisfying the requirements of Presidential Decree No. 1586 and its implementing rules and regulations and upon recommendation of the Environmental Impact Assessment Review Committee, the Department of Environment and Natural Resources through the Environmental Management Bureau has decided to grant an ECC to the above-mentioned project.

With the issuance of the ECC, DPWH is expected to fully implement the measures presented in the Environmental Impact Statement (EIS) intended to protect and mitigate the project's predicted adverse impacts on community health, welfare, and the environment. Likewise, environmental considerations shall be incorporated in all phases and aspects of the project.

This Certificate does not create any right nor shall be used as an authorization to implement the project and automatically expires if the project has not been implemented within five (5) years from ECC issuance, or if the ECC was not requested for extension within three (3) months from the expiration of its validity. This Office shall be monitoring the project periodically to ensure strict compliance with the stipulations cited in the attached ECC.

Please be guided accordingly.

Very truly yours,

MARIA ANTONIA YU LOYZAGA
Secretary

ENVIRONMENTAL COMPLIANCE CERTIFICATE
(Issued under Presidential Decree No. 1588)

ECC-CO-2209-0032

THIS IS TO CERTIFY THAT THE PROONENT, Department of Public Works and Highways (DPWH), as represented by its Senior Undersecretary, Emilio K. Sadalin, is granted this Environmental Compliance Certificate (ECC) for its proposed Parañaque Spillway Project located at the Cities of Muntinlupa, Parañaque, and Las Piñas, Metro Manila, and City of Bacoor, Province of Cavite by the Department of Environment and Natural Resources (DENR) through the Environmental Management Bureau (EMB).

SUBJECT to the conditions and restrictions set out herein, labeled as Annexes A and B, this ECC is issued with the following details:

PROJECT DESCRIPTION

This Certificate covers the construction and operation of the proposed Parañaque Spillway Project, with a reservoir flooded/inundated area of 67.4 square kilometers by 2038 based on 100-year probability, to be located at the Cities of Muntinlupa, Parañaque, and Las Piñas, Metro Manila, and City of Bacoor, Province of Cavite. The proposed project is comprised of the following components:

Component	Main Facilities and Equipment
Inlet Facility (Intake)	<ul style="list-style-type: none"> • Intake, Intake open channel, Sand sedimentation pond, Inlet vertical shaft, Operation Center Building • Boom (Floating weed trap), Screen (Trash rack), Dust remover • Two (2) road bridges and one (1) railway bridge • Suspended water drainage pump, Operation system • Ventilation fan • Elevator, Stairs, Gondola, Hoist crane • Generator, Transformer, Fuel tank • Water level gauge, Remote monitoring device, Siren • Inlet control gate, Stop-log, machine building, gate building
Outlet Facility (Drainage)	<ul style="list-style-type: none"> • Outlet vertical shaft, outlet, outlet channel, control center building • Main drainage pump, Suspended water drainage pump, Transformer, Generator, Operation system • Ventilation fan • Elevator, Stair, Gondola, Hoist crane, Pressure door • Generator, Transformer, Fuel tank • Water level gauge, Remote monitoring device, Siren • Outlet gate, Stop-log, Operation Center Building, machine building, gate building
Spillway (Underground Tunnel Type)	<ul style="list-style-type: none"> • Underground tunnel • Manual cleaning machine, High-pressure cleaning car • Wheel-loader, Vacuum car • Ventilation fan

This Certificate is issued in compliance with the requirements of Presidential Decree (PD) No. 1588 and its Implementing Rules and Regulations (IRR). Non-compliance with any of the ECC-CO-2209-0032

ANNEX A

I. ENVIRONMENTAL MANAGEMENT

All commitments, mitigating measures and monitoring requirements contained in the Environmental Impact Statement (EIS) particularly in the Environmental Management Plan/Environmental Monitoring Plan (EMP/EMoP), shall be instituted to minimize any adverse impact of the project to the environment and comply with all environmental regulations (RA 8749, RA 9275, RA 6969, RA 9003) throughout the project implementation, including the following:

POTENTIAL IMPACT PER PROJECT ACTIVITY PER PROJECT PHASE	MITIGATING MEASURES
A. Construction/Site Development Phase	
Construction of open channel, jetty and outlet facility including operation of the construction yards in the inlet and outlet facilities	<ul style="list-style-type: none"> Implementation of the solid waste management program by the contractor Regular transport of construction debris and other solid waste in the approved designated area by the DENR.
Improper management of construction wastes and other solid wastes which may lead to soil contamination, contamination of nearby water bodies, potential health risks and may induce flooding due to clogging of drainage	<ul style="list-style-type: none"> Collect, store and dispose hazardous wastes in accordance with RA 6969 Treatment and dispose of hazardous wastes through DENR-accredited waste treaters
Deposition or accumulation of sediments in mangrove roots (i.e., pneumatophores) due to soil erosion	<ul style="list-style-type: none"> Establishment of sediment traps, erosion barriers, and silt curtains Regular removal of silt and sediments
Wildlife displacement due to dust and noise pollution	<ul style="list-style-type: none"> Operation of high noise-emitting tunneling equipment must be scheduled to prevent unnecessary noise and dust accumulation. Regular water sprinkling to minimize dust resuspension Schedule drilling activities, especially in the Manila Bay side of the project, in accordance with the migration and breeding schedule of birds. Activities that will generate high level noise should not coincide with the breeding season of birds.
Possible siltation of nearby bodies of water and clogging of drainage due to surface run-off from the construction sites	<ul style="list-style-type: none"> Establishment of sediment traps, erosion barriers, and silt curtains Regular removal of silt and sediments
Erosion of sediment and silt can increase water turbidity and significantly decrease light penetration, thereby reducing the quantity of light available for phytoplankton and overall primary	<ul style="list-style-type: none"> Stockpiles should be bunded or covered especially during heavy rains which can potentially erode and carry sediments to the marine environment and lakeshore areas. If possible, construction activities should be scheduled during the dry or summer months to avoid downpour of heavy rain which can potentially erode

II. GENERAL CONDITIONS

The Proponent shall:

1. Install and maintain a wastewater treatment facility to treat all wastewater coming from different sources. Likewise, the proponent shall ensure that discharges/effluents comply with the DENR standards at all times and shall comply with all the provisions of RA 9275, the Philippine Clean Water Act of 2004 and its Implementing Rules and Regulations;
2. Install and maintain air pollution control devices to minimize dust and gas emissions from various sources. Impose a speed limit and conduct daily road watering. Likewise, the proponent shall ensure that emissions at all times comply with the DENR standards and with all the provisions of RA 6749, the Philippine Clean Air Act of 1999 and its Implementing Rules and Regulations;
3. Install, operate, and maintain the collection, handling, treatment, storage, and disposal facilities or any system serving various sources of hazardous waste. The system shall be properly operated to ensure compliance with all the provisions of RA 6999, the Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990 and its Implementing Rules and Regulations;
4. Install, operate, and maintain the collection, handling, treatment, storage, and disposal facilities or any system serving various sources of solid waste. The system shall be properly operated to ensure compliance with all the provisions of RA 9003, the Ecological Solid Waste Management Act of 2000, and its Implementing Rules and Regulations;
5. Implement an effective Information, Education and Communication (IEC) Program to inform and educate all stakeholders especially its contractors, workers, and local residents, on the following:
 - a. Mitigating measures embodied in its EIS, the conditions stipulated in this Certificate, and the environmental and human safety features of the project for greater awareness, understanding, and sustained acceptance of the project;
 - b. Disaster risk reduction management measures and climate change-related issues/concerns, particularly flooding and landslides.

A status report on the IEC implementation shall be submitted as part of the Semi-annual Compliance Monitoring Report (CMR) to EMB Central Office (CO) through its Online System pursuant to EMB MC No. 2016-01 issued on 18 January 2016.

Republic of the Philippines
Province of Cavite
CITY OF BACOOR
OFFICE OF THE SANGGUNIANG PANLUNGSOD

8. Implement a comprehensive Social Development Program (SDP) and submit a separate report together with the Compliance Monitoring Report (CMR) to the EMB Central Office, copy furnished EMB Regional Office (NCR and CALABARZON) on a semi-annual basis;
7. Develop a Social Development Plan (SDP) per DMO 2023-01 / Corporate Social Responsibility (CSR) Plan on the conservation, protection, and management of the Las Piñas – Parañaque Wetlands Park, in coordination with the Protected Area Management Board. A status report shall be submitted as part of the semiannual CMR to the EMB CO through its Online System;
6. Submit reforestation and carbon sink program to mitigate greenhouse gas (GHG) emissions of the Project in line with the DENR's thrust for GHG emission reduction and National Greening Programs to EMB Central Office and EMB Regional Office (NCR and CALABARZON) sixty (60) days prior to the start of project construction and development;
9. Set up the following:
 - 9.1. A readily available and replenishable Environmental Guarantee Fund (EGF) to cover the following expenses:
 - a. For further environmental assessments, compensation/ indemnification for whatever damages to life and property that may be caused by the project;
 - b. Rehabilitation and/or restoration of areas affected by the project's implementation; and
 - c. Abandonment/decommissioning of the project facilities related to the prevention of possible negative impacts and as a source of fund for contingency and clean-up activities;
 - 9.2. A Multipartite Monitoring Team (MMT) in accordance with DAO 2017-15 and DAO 2018-18. The MMT shall primarily oversee the compliance of the proponent with the Environmental Management Plan/ Environmental Monitoring Plan as well as the conditions of its ECC; and
 - 9.3. 13.3 A replenishable Environmental Monitoring Fund (EMF) to cover all costs attendant to the operation of the MMT such as training, sampling, and analysis, the hiring of technical experts, accommodations, and transportation.

The amount and mechanics of the EGF, EMF and the establishment of the MMT shall be determined by EMB CO and the proponent in coordination with EMB Regional Office (NCR and CALABARZON) through a Memorandum of Agreement (MOA) which shall be submitted at least six (6) months prior to project construction/implementation.

10. Establish an Environmental Unit (EU) that shall competently handle the environment-related aspects of the project. In addition to the monitoring requirements as specified in the Environmental Management Plan/ Environmental Monitoring Plan, the EU shall have the following responsibilities:

- a. Monitor actual project impacts vis-a-vis the predicted impacts and management measures in the EIS;
- b. Recommend revisions to the EMP/EMoP, whenever necessary subject to the approval of EMB Central Office. Revisions shall also consider the result of the validation of air dispersion modelling.

Republic of the Philippines
Province of Cavite

CITY OF BACOOR

OFFICE OF THE SANGGUNIANG PANLUNGSOD

- c. Ensure that data gathered during monitoring activities are properly documented, assessed, evaluated, and reported to EMB (Central Office, NCR, and CALABARZON) in accordance with the standard formats; and
 - d. Ensure that monitoring and submissions of reports to EMB (Central Office, NCR, and CALABARZON) are carried out as required.
11. Ensure that its contractors and sub-contractors strictly comply with the relevant conditions of this Certificate;
 12. Register its account in the Compliance Monitoring Report (CMR) Online platform found in its website upon receipt of this ECC. The first CMR covering the immediate semester shall be submitted after the issuance of the ECC. The succeeding CMR shall be submitted semi-annually through EMB Central Office Online System together with other reports mentioned above;
 13. Submit Compliance Monitoring Reports (CMR) semi-annually through EMB Central Office Online System together with other reports mentioned above; and
 14. Submit the Abandonment/Decommissioning Plan to the EMB (Central Office, NCR, and CALABARZON) for approval, one (1) year prior to project's abandonment.

III. RESTRICTIONS

The Proponent shall:

15. Submit an approved Resettlement Action Plan to EMB Central Office sixty (60) days prior to project implementation;
16. Coordinate with other concerned Government Agencies in the management of the project which shall be implemented only after securing all the necessary and relevant permits from other pertinent Government Agencies;
17. Undertake no activities other than what were stipulated in the EIS. Any expansion of the Project beyond the Project description or any change in the activity or transfer of location shall be subject to a new Environmental Impact Assessment; and
18. In case of transfer of ownership of this Project, the same conditions and restrictions as contained herein shall apply and the transferee shall be required to secure an amendment of this ECC with the EMB CO within fifteen (15) days from the transfer of ownership.

Annex B

PROJECT ASSESSMENT PLANNING TOOL

For the assistance of the proponent and the Government agencies concerned in the management of the Project and for better coordination in mitigation of the impacts of the Project on its surrounding areas and the environment, the following have been recommended by this Office to the parties and authorities concerned, for appropriate action.

<i>Environmental Planning Recommendations and Regulatory Requirements for the Proponents</i>	
A. Department of Labor and Employment – Bureau of Working Conditions	
The proponent shall:	
1.	Comply with pertinent provisions of PD No. 442, as amended ("Labor Code of the Philippines"); and
2.	Comply with pertinent provisions of RA No. 11058 ("An Act Strengthening Compliance with Occupational Safety and Health Standards and Providing Penalties for Violations Thereof").
B. Department of Health (DOH)	
The Proponent shall:	
3.	Comply with pertinent provisions of PD No. 656 ("Code on Sanitation of the Philippines");
4.	Conduct a continuing study on the effects of the Project on health of workers and affected residents, the results of which shall be submitted every two (2) years to the DOH, copy furnished to EMB Central Office;
C. Local Government Unit	
The proponents shall:	
5.	Comply with pertinent provisions of PD No. 1096 ("National Building Code");
6.	Give priority of employment to qualified local residents. Adequate public information for jobs available to local residents in the affected areas shall be provided;
7.	Coordinate with the LGU concerned for the implementation of its SWMP;
8.	Ensure that the noise from the operation shall not unduly disturb nearby communities, especially at night;
9.	Inform the host communities of the duration and timing of any noisy construction or operation.
D. DENR NCR and DENR CALABARZON	
The Proponent shall:	
10.	Secure tree cutting permit and coordinate with the DENR NCR and DENR CALABARZON regarding the loss of specific species of vegetation and/or trees that need to be replaced.
E. DENR Biodiversity Management Bureau (BMB)	
The proponent shall:	
11.	Coordinate with BMB for the preparation and implementation of the Biodiversity and Monitoring Systems pursuant to Technical Bulletin Nos. 2016-05 and 2019-04.
F. National Water Regulatory Board	
The proponents shall:	
12.	Secure the necessary water permit;
13.	Coordinate with NWRB for the depletion of water resources and competition in water use.
G. Metropolitan Waterworks and Sewerage System (MWSS)	
The proponent shall:	
14.	Coordinate with MWSS and its concessionaire to avoid damage to water supply lines.
H. Metro Manila Development Authority (MMDA)

EXCERPTS FROM THE MINUTES OF THE PROVINCIAL DEVELOPMENT COUNCIL EXECUTIVE COMMITTEE MEETING HELD ON 24 OCTOBER 2023 AT THE CONFERENCE ROOM, OFFICE OF THE PROVINCIAL GOVERNOR, CAVITE PROVINCIAL CAPITOL, TRECE MARTIRES CITY, CAVITE

RESOLUTION NO. 2023 - 14

A RESOLUTION FAVORABLY ENDORSING TO THE CALABARZON REGIONAL DEVELOPMENT COUNCIL (RDC) THE SUPPORT OF THE PROVINCE OF CAVITE TO THE PARAAQUE SPILLWAY PROJECT OF THE DEPARTMENT OF PUBLIC WORKS AND HIGHWAYS (DPWH)

WHEREAS, due to its geographic location, Metro Manila and Southern Tagalog are among the regions that are most vulnerable to massive flooding.

WHEREAS, the DPWH Surveyors emphasized that the flood linkage on the Laguna Lakeshore occurs throughout the rainy season and it is a matter that cannot be disregarded further.

WHEREAS, officials from the DPWH, the National Economic and Development Authority (NEDA), the Department of Finance (DOF), and a mission group from the Japan International Cooperation Agency (JICA) met to gather information for the planned Paraaque Spillway Project, which aims to protect low-lying communities in Metro Manila from massive flooding.

WHEREAS, the Paraaque Spillway Project, a tunnelized waterway, is the selected priority project since it can provide effective flood mitigation with a shorter implementation period and with minimal disturbance as it will be constructed underground.

WHEREAS, this project aims to mitigate inundation damage of the Laguna de Bay Lakeshore Area, at the result of flood control issues due to the constant increase in water level of Laguna de Bay, as well as to contribute to the stabilization of livelihoods, protection, and early post-disaster recovery, including the Pasig-Malabon River basin in a unified manner.

WHEREAS, the project is designed to drain excess lake water from Laguna de Bay (Laguna Link) into Manila Bay through the cities of Muntinlupa, Parañaque, and Las Piñas in Metro Manila, and the City of Bacoor in the Province of Cavite, via an underground drainage channel to control the water level of Laguna de Bay.

WHEREAS, the project also involves the construction of an open channel about 300 meters long and an underground tunnel about 9.6 kilometers long, with its inlet at Barangay Bulak, Muntinlupa City, and its outlet in Manila Bay.

WHEREAS, after a thorough discussion of the merits and importance of consistently preserving the lives of Civilians against floods and its underlying effects, the Body has found that the Paraaque Spillway Project is worthy of endorsement to the CALABARZON RDC.

NOW, THEREFORE, based on the foregoing premises and in motion duly seconded, be it

RESOLVED, AS IT IS HEREBY RESOLVED, to endorse to the CALABARZON RDC the Paraaque Spillway Project of the DPWH.

DEC 11 2023

Honorable STRIKE B. REVILLA

Mayor
City of Bacoor
3rd Floor Bacoor Government Center
Molino Blvd., Bacoor, Cavite

Dear Mayor Revilla:

Subject : Request for the City Government of Bacoor and its City Development Council Endorsement for the Proposed Parañaque Spillway Construction Project

This has reference to the proposed implementation of the above-captioned subject project (Please see location map – ANNEX A), to be undertaken by this Department, which is being proposed to be funded under the Official Development Assistance (ODA), through the Japan International Cooperation Agency (JICA), Special Terms for Economic Partnership (STEP) Loan. The project aims to mitigate inundation damage at the Laguna de Bay Lakeshore Area, as the need for flood control arise due to constant increase of water level at Laguna de Bay. It further aims to contribute to the stabilization of livelihood, production, and early post disaster recovery including the Pasig-Marikina River basin in a unified manner.

As you may be aware that the said project is one of the priority projects of the current Administration as it is included in the list of the National Economic and Development Authority (NEDA) Infrastructure Flagship Projects (IFPs) (ANNEX B), wherein the above project was endorsed and/or recommended to NEDA-Investment Coordination Committee (ICC)-Cabinet Committee (CC) by the NEDA-ICC-Technical Board (TB) during its meeting last July 27, 2023. The NEDA-ICC-CC decided to discuss the project anew, with instructions for the DPWH to secure the Environmental Compliance Certificate (ECC) from the Department of Environment and Natural Resources (DENR), among others. Consequently, the DENR had issued the required ECC on November 14, 2023 (ANNEX C).

It is worth to mention that the Provincial Government of Cavite and its Provincial Development Council (PDC) had gave their support and/or no objection to the proposed project (Please refer to ANNEX D).

The endorsement from the Bacoor City Government and its City Development Council (CDC) on the aforementioned project is urgently needed as this is one of the requirements of the Regional Development Council (RDC) – IV-A for its endorsement on the project and since the same will also support the formulation of the JICA, STEP Loan for the implementation of the proposed subject project.

In view hereof, may we again respectfully seek the full support from your good office and its CDC, through the issuance of Endorsement and/or Certificate of Support and CDC Resolution relative to the implementation of the above proposed project.

RE : SUBMISSION OF A BRIEF OPPOSING KEY FACTOR REGARDING THE CONSTRUCTION OF
PARAÑAQUE SPILLWAY PROJECT

DATE : 14, February 2024

Given this, our main concern is the source of income of our fisherfolk, primarily in the mussel farming industry and every fisherfolk whose livelihood is engaged in mussel. There will be a great impact on the mussel production. The spat collection will be lessened due to the reason of the freshwater spillway.

There will also be an effect on the other bi-valve species, crustaceans, and other marine products.

The Fisherfolk organization is against the construction of Parañaque Spillway Project.

For your records and references.

Thank you very much.

Respectfully,

Chua
ALLAN G. CHUA

City Mayor, City Gov't of Bacoor

Thru : ATTY. AIMEE TORREFRANCA-NERI
City Administrator

FROM : City DRRM Officer

DATE : 1 April 2024

SUBJECT : Submission of a brief opposing key factor regarding the construction of Parañaque Spillway Project

Provided that the proposed Parañaque Spillway Project met the standards of the Department of Environment and Natural Resources, compliant to the Environmental Compliance Certificate, thus inevitable circumstances can lead to high economic impacts particularly in coastal areas of the City of Bacoor, including the following:

- a) The possibility of water pollution that has an adverse effect on the economic, environment and on human health due to the contamination of water bodies during the construction of the said project.
- b) Susceptible to erosion due to an underground drainage channel that may cause failure of spillway structures which may lead to a catastrophic release of water resulting in a severe downstream flooding and possible loss of life predominantly in most affected areas.

However, these negative impacts require a thorough feasibility study of the said project.
